## ABSTRACT OF THE DISCLOSURE

2	A system and method for providing links to services available to
3	an operably connected local computer over a network. The present invention
4	includes a thin portal service for finding services available to the local
5	computer, a thin portal service web content created by the thin portal service
5	for returning links to the discovered available services, and a web browser
7	installed on the local computer for displaying the thin portal service content.
